

# NEW: WE'VE MADE IT EASY TO MAKE MORE MONEY

## A MESSAGE FROM MOPAR

### Airbag Safety Recall Sublet Program Announcement:

An Opportunity for Installers to Increase Their Bottom Line.

The safety of the people who drive and ride in Chrysler, Dodge, Jeep® and Ram Brand vehicles is our highest priority. Despite substantial and unprecedented outreach activities, many vehicles remain unrepaired. The pace of Airbag Safety Recall completions continues to slow and is of great concern to Fiat Chrysler Automobiles.

In an effort to provide additional ways to complete recalls in an efficient manner, Chrysler, Dodge, Jeep and Ram dealers are now permitted to sublet certain Airbag Safety Recalls to independent repair facilities (IRFs) and auctions.

### FCA US Airbag Safety Recall Sublet Program

*What It means to Installers:*

Participating IRFs and auctions work directly with local FCA dealers to formalize an agreement to enable the repair of these critical airbag recalls. The IRF and/or auction performs the repair and is **reimbursed** for this activity directly from the dealer like any other sublet repair.

### Sublet Repair Process - How It Works:

IRFs and Auctions begin by checking the Chrysler, Dodge, Jeep, and Ram vehicles being serviced at their facility for open recalls by entering the VIN on [recalls.mopar.com](http://recalls.mopar.com)

### Getting Started

1. Contact your local Chrysler, Dodge, Jeep and Ram dealer and **tell them you're interested** in the FCA US Airbag Recall Sublet Program.
2. Agree on a process for notification and parts purchase with your Dealer Partner.
3. Complete the Indemnification Agreement, available online at [www.moparrepairconnect.com/mechanical/airbagrecallsuletprogram](http://www.moparrepairconnect.com/mechanical/airbagrecallsuletprogram).
4. Send a copy of the completed Indemnification Agreement to [Airbag\\_IRF\\_indemnity@fcagroup.com](mailto:Airbag_IRF_indemnity@fcagroup.com).

## Tool Requirements

A generic scan tool is required to clear codes if present after the repair.

## Repair Procedures

FCA US airbag recall repair procedures are available online at [www.moparrepairconnect.com/mechanical/airbagrecalls](http://www.moparrepairconnect.com/mechanical/airbagrecalls) or can be provided by your Dealer Partner.

## Sublet Program Airbag Safety Recalls Chart

The 10 safety recalls involved as identified by the NHTSA Campaign Number and the FCA US Campaign Number are listed in the chart below.

NHTSA Campaign Number	FCA US Campaign Number	Recall Description
15V-313	R25	Driver Airbag Inflator
15V-312	R26	Passenger Airbag Inflator
15V-444	R37	Driver Airbag Inflator
17V-478	R49	Passenger Airbag Module
16V-077	S14	Driver Airbag Module
16V-081	S15	Driver Airbag Inflator
16V-352	S43	Passenger Airbag Inflator
16V-974	S92	Driver Airbag Inflator
18V-021	U03	Passenger Airbag Inflator
19V-018	V01	Passenger Airbag Inflator

We appreciate your support in our effort to help complete all un-remediated airbag safety campaigns.

Thank You,

**Mopar Program Headquarters**
